#### **DETAILED ACTION**

1. This Office Action is the answer to the Amendment filed on January 24, 2005, which paper has been placed of record in the file.

2. Claims 5, 6, 10-13, and 16-19 are pending in this application.

## Response to Arguments/Amendment

3. Applicant's arguments with respect to claims 5, 6, 10-13, and 16-19 have been considered but are most in view of new grounds of rejection.

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 5, 6, 10-13, and 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Maggioncalda et al (hereinafter Maggioncalda), U.S. Patent No. 5,918,217.

Regarding to claims 5, 6, 10-13, and 16-19, Maggioncalda discloses a computer system and computer readable medium, comprising:

a processor programmed to perform an arithmetic performance attribution

Application/Control Number: 09/698,693 Page 3

Art Unit: 3628

computation to determine portfolio performance (figure 2, processor 202; column 6, lines 25-42);

a display device coupled to the processor arithmetic performance attribution computation for displaying a result of the arithmetic performance attribution computation (figure 1, display 221; column 6, lines 45-55).

Examiner submits that the claimed invention recites an intended use, although Maggioncalda fails to discuss the intended use which is to perform an arithmetic performance attribution computation in a specific way, including by determining coefficients of a specifically recited type, and determining portfolio relative performance at a specific way using these coefficients, Maggioncalda's computer system is capable of performing an arithmetic performance attribution computation and displaying a result of the arithmetic performance attribution computation. Therefore, it would have been obvious to one with ordinary skill in the art at the time the invention was made to modify Maggioncalda's to include the feature above for the purpose of performing an arithmetic performance attribution computation in a specific way, determining portfolio relative performance at a specific way and displaying a result of the arithmetic performance attribution computation.

"The recitation of a new intended use for an old product does not make a claim to that old product patentable." *In re Schreiber*, 44 USPQ2d 1429 (Fed. Cir. 1997).

#### Conclusion

6. Claims 5, 6, 10-13, and 16-19 are rejected.

Application/Control Number: 09/698,693

Art Unit: 3628

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Nga B. Nguyen whose telephone number is (571) 272-6796. The examiner can normally be reached on Monday-Thursday from 9:00AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hyung S. Sough can be reached on (571) 272-6799.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 306-1113.

8. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

C/o Technology Center 3600

Washington, DC 20231

Or faxed to:

(703) 872-9306 (for formal communication intended for entry),

or

(571) 273-0325 (for informal or draft communication, please label "PROPOSED" or "DRAFT").

Hand-delivered responses should be brought to Knox building, 401 Dulany Street, Alexandria, VA, First Floor (Receptionist).

Nga B. Nguyen
